

WOOD PALLETS ARE PERFECT FOR SHIPPING INSECTS, MOLD AND BACTERIA.

FOOD? NOT SO MUCH.

SHIP IT SMARTER. SHIP IT SAFER. SHIP IT ON STEEL. Steelpac introduces reusable steel pallets that provide superior protection against cargo contamination. Because steel is inorganic, Steelpac pallets cannot hold moisture, support mold growth, or host insect infestation. Plus, the strength of steel means you get reliable performance, turn after turn — with greater stability and durability than plastic. Lightweight, non-flammable, and rackable without reinforcement, Steelpac pallets help reduce operational costs and improve efficiency throughout the entire shipping process.
